Election/Restrictions

Claims 25-57 are generic to the following disclosed patentably distinct species:

- (1) species of alpha-adrenergic agonist, e.g. compounds of formulas 3-6, 11 or 14; and
- (2) species of pain, e.g. diabetic neuropathy, inflammatory pain and post-operative pain.

The species are independent or distinct because the particular alpha-adrenergic agonists as recited in the claims (see in particular claims 49-55) represent varying and distinct compounds having classifications that extend across multiple classes and subclasses. Also, the different types of pain, such a diabetic neuropathy, inflammatory pain and post-operative pain, represent different conditions having different etiologies and modes of treatment. Accordingly, a search for all alpha-2 adrenergic agonists and the treatment of all types of pain would pose an undue burden on the Office.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, i.e. a single disclosed species of alpha-adrenergic agonist, such as the compounds of formula 3-6, 11 or 14 (as recited in claims 49-51 and 53-55), and a single disclosed species of pain, such as neuropathic pain, visceral pain, post-operative pain, inflammatory pain, arthritic pain, or headache pain (as recited in claims 38-46), even

Art Unit: 1617

though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Currently, claims 25-48, 52 and 56-57 are considered to be generic to all species of alpha-adrenergic agonist, and claims 25-37 and 47-57 are considered to be generic to all species of pain treatment.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1617

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complicated nature of the restriction, the restriction requirement is being made via written correspondence in lieu of a telephone interview.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abigail M. Cotton whose telephone number is (571) 272-8779. The examiner can normally be reached on 9:30-6:00, M-F.
